VACATION TIME

Travel to comfort on the famous transcontinental train, "Canadian Limited."

go for a week, a month or more, but go!

DELIGHTFUL RESORTS FROM COAST TO COAST

offer ample scope for your favored recreations

EAST

MINAKI MUSKOKA LAKES, 1,000 ISLANDS—These are only a few of the resorts to Canada which is a veritable land of Heart's Delights. In this province there is a resort to suit every taste and purse.

IN ANCIENT QUEBEC—The Vacation Land of Romance, where old-world customs and traditions still abound. Many lovely resorts on the Lower St. Lawrence, in the heart of French Canada.

THE PROVINCES BY THE SEA—See old forts and woodland playgrounds along the Maritime Provinces. Take the sailing, forest paddles make each day a joy.

WEST

CANADIAN ROCKIES—Visit the playground of Canada's wonderful West—a land of mystery, of towering, snow-capped mountains, of deep, silent lakes, of rugged, winding trails, of superb scenery, of thrilling adventures, of unforgettable experiences.

THE PACIFIC COAST—Visit the most beautiful of the world's great seacoasts, where the sun and sea and sand combine to make a perfect vacation.

Donators to the Graminia Ex.

Among those from Stony Plain and district who donated prizes toward the Exhibition recently held at Graminia are:

T. J. Hardwick
A. E. Michael, S. P. Hardware
Lorenz Zilliox
Donald MacLeod, M.L.A.
L. Kowensky
Joe Whiteslock
Wm. Kelly
James Christie
Mr. Oppertshausar
L. M. Larson, Royal Cafe
J. P. Clarke
R. E. Wood
Louis Wudel
Carl Fischer
P. Anderson, Baker
J. Hinkel, Butcher
M. M. Mecklenburg
Stony Plain Motors
W. J. Fuhr
H. Sherwin, Spruce Grove
W. Connolly, Spruce Grove
F. Farrell, Edmonton

The Secretary of Graminia U.F.W.A. (Mrs. Frank Sherwood), under whose auspices the Exhibition was held, wishes to thank the above and all others who helped make the Exhibition the great success it was.

Co-op. Directors Meet.

The regular quarterly meeting of the directors of Stony Plain Constituency Co-operative Ass'n was held Saturday afternoon at Gainford, but owing to the farmers' busy season now being on, there was not the attendance anticipated when the date for the meeting was set.

Those from this district who attended were: Mrs. C. Pitzler, Messrs. John Evijs, A. J. Anderson, and W. T. Propp, the latter being the secretary.

Donald MacLeod, M.L.A., gave an inspiring address on Co-op. principles; and several other addresses were heard.

The action of the directors in the course they had taken in branching out, with the object of meeting the wants of farmers, was reported to have met with the general approval of the members.

The matter of changing the date of the annual convention billed for Nov. 12 came up. The suggestion of the change had been made by some, but it was found that making the change would be practically impossible, as the arrangements for the convention on that date had been completed.

Another meeting of the Co-op. will be held when farmers have more leisure to attend.

Alberta's Official Road Map.

A copy of the new official road map of Alberta has been received. It was compiled by the provincial Dept. of Public Works, with a brief description of the province and its resources, general information for tourists, customs regulations, etc. The map is a handy one to have, both for individual use and to send to friends outside the province.

Initiative Wins.

When Marshal Foch was given command of the French army during the World War, one of the first things he is reported to have said was: "To h—l with history and principles! What is the problem?" Though Foch was perhaps the world's greatest student of military strategy, he was no slave to it. He tackled each problem with initiative and vim. This method won for Foch.

The Review of Reviews magazine declares that a study of recent reports will show that those industrial organizations that exerted wise and sustained vim and initiative profited more than those which stood pat watchfully waiting, or those which imitated others. It points out that the larger the business, the more it tends to become standardized. System and routine often kill initiative and stifle progress. This explains in part why a small organization will so often place a new, out-of-the-ordinary product upon the market, something for which a real need has long existed but which no one previously appeared to have recognized.

Safety glass, now used so widely for windshields and bank cages, is the result of alertness and initiative. Non-shattering glass was discovered accidentally by a French chemist who knocked over a test-tube that had been used for ammonia. Stopping to pick up the pieces, he discovered that the paste substance in the tube held the broken glass intact. Mentally alert, the chemist remembered that the tube contained a mixture of trinitro-cellulose, glycer and acetone. Experiments followed and safety glass was the result.

Rear Admiral David Watson Taylor is credited for having been able to reduce the coal bill of the United States Navy by one-half, utilizing the bow wave for ship propulsion. A biscuit company making money only marginally saw its sales rise enormously by fashioning cookies in the shape of dogs, animals, and similar enticing forms. A manufacturer of towels was able to build up sales enormously by introducing towels in colors to harmonize with the bathroom tiles. Children's towels were created. Complete ensembles were worked out—towels, washcloths, bathmats. That plant is reported to have maintained full capacity throughout the depression.

Foods have undergone marked development because of research followed by initiative. It was discovered that tomato juice is rich in vitamins A, B, and C, and in three years, tomato juice has caught the public's fancy. Progressive manufacturers of canning machinery were alert to their opportunity. In two years the sales of canned tomato juice have a gain of 629 per cent, and bottled 177 per cent.

Today there is no paucity of opportunities. But there is paucity of vision, initiative, and courage to capitalize them. As Charles Kettering, vice-president in charge of research, General Motors Corporation, says, "Business will come back when we get products that people want." If one-tenth of the energy was spent in getting such products instead of stirring up the mud, we would get along better.

The task of leaders is to lead. There is not an industry or a line of manufacture but affords unappreciated opportunity for initiative. Today, as during the days of the World War, executives might think to advantage as Marshal Foch was thinking when he said, "To hell with history and principles! What is the problem?"

Mine Taken Over By Workers

Interesting Experiment Is Under Way In Nova Scotia

For a quarter of a century the people of Inverness, N.S., have been working for somebody to take over the mine. Now they will be in business for themselves, directing and operating the coal mine that is the only industry in the town, and marketing its products.

Their co-operative plan, approved recently by the government of Nova Scotia, is expected to banish the threat, long dreaded by the town's 3,000 inhabitants, that the mine would be closed.

Under the agreement with the government, operation and control of the mine has been transferred to a new company, the Inverness Coal Co-operative Company, Limited, members of which are to be miners employed in that mine and taxpayers of Inverness.

Persian Balm preserves and enhances woman's natural heritage of beauty. For sheer feminine loveliness it is unrivalled. Tones and rejuvenates the skin, and makes it exquisite in texture. Delightful to use. Smooth and velvety, it imparts a youthful charm to every complexion. Indispensable to all dainty women. Especially recommended to make hands soft and white. Delicately fragrant. Preserves and enhances the loveliest complexions.

New Paint Seems Uncanny

How hot a kettle is at any moment can be told by the color of a paint which has just been invented. A kettle painted with the new material, which is a mixture of salts of mercury and copper, looks bright red when cold, but as it warms up above 140 degrees it becomes maroon colored. At 20 degrees higher it takes on a dull, chocolate hue, and at boiling point it is quite black. Cooling brings it its color back.

Try Lydia E. Pinkham's Vegetable Compound

Felt Terribly Nervous
Fagged out... always melancholy and blue. She should take Lydia E. Pinkham's Vegetable Compound. Its tonic action builds up the system. Try it.

Feeder Purchase Policy

Designed To Encourage Winter Feeding Of Cattle And Lambs

Renewal of the Feeder Purchase Policy designed to encourage the winter feeding of cattle and lambs of suitable type and quality is announced by the Hon. Robert Weir, Federal Minister of Agriculture. Under the terms of this policy, broadly put, the Federal Department will pay the reasonable travelling expenses of a farmer or his agent to the stockyard point of purchase, the feeder sales, or nearest station to range point at which feeder stock is purchased. To secure the benefits of the policy at least one car of stock (20 head of cattle or 40 lambs, or a combined car, figured on 2 lambs as the equivalent of one beef animal) must be purchased. Stock purchased is subject to approval as to type and suitability by the official representative of the Dominion Live Stock Branch serving the point of purchase. Special provision has been made to extend the benefits of the policy respectively to farmers of Eastern Canada, of the Prairie Provinces, and of British Columbia. Complete details and information about the policy and the benefits can be secured by writing the nearest stockyard agent of the Dominion Live Stock Branch, or direct to R. S. Hamer, Chief, Cattle Division, Dominion Live Stock Branch, Ottawa. The policy is operative for a period of five months from and after August 1, 1932.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the succor it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

Buys His Home Village

After an absence of more than 40 years, William McGregor, who left his home in Latheronwheel, Calthness, Scotland, to seek his fortune in Australia, has returned to become the owner of his native village. As a boy he was employed in herding cows. Director of several Australian companies, he came back to visit his sister, Miss Jessie McGregor, who still lives in the cottage where they were born. He bought the village when it was placed on the market recently. It has about 120 inhabitants.

Keep that drain clear...

FREE BOOKLET: The Gillett's Lye Booklet tells many ways to make all your cleaning easier. Gives complete instructions for soap making, for tree spraying, disinfecting, and other uses on the farm. Write to Standard Brands Limited, Fraser Ave. & Liberty Street, Toronto, Ontario.

GILLETT'S LYE

Never dissolve lye in hot water. The action of the lye itself heats the water.

EATS DIRT

this easy way

Gillett's Lye dissolves clogging grease and never harms enamel

DON'T run up a plumber's bill every time your drain pipes clog. Fix them yourself... this easy, workless way.

Just sprinkle Gillett's Pure Flake Lye down your drains and toilet bowls each week. Use it full strength, for Gillett's Pure Flake Lye will not in any way harm the finish of enamelled sinks or bathtubs.

Grease and dirt dissolve like magic. Germs are killed. Odors banished. Your drains run free and clear. And... there's no plumber's bill afterwards!

Tell your grocer it's Gillett's Pure Flake Lye you want. This powerful cleanser and disinfectant saves hours of scrubbing. Try a tin.

Stock Exchange Seats Up

Estimated Value Shows Big Increase In Short Time

With the recent sale of a seat on the New York Stock Exchange for \$120,000 the value of the 1,375 seats went up by 33 per cent. The estimated worth of the seats is now placed at \$165,000,000, an increase of \$41,250,000 over the total of a week before.

The traders in Wall Street are preparing to pick up where they left off a few years ago. It is getting on for three years since the crash on October 29, 1929, when 16,400,000 shares changed hands.

People have been hoarding their money for a long time. They are beginning to feel the itch to spend. The stock exchange is one of the barometers, even if it is a place where many lose their savings. And the exchange is girding itself for a pick up in its business.—Border Cities Star.

Externally Or Internally, It Is Good.

When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve asthmatic bronchitis, whooping cough and respiratory organs. Try it and be convinced.

Canadian Radio Programme Broadcast From 'Plane

Contact Made With Station From Height Of 3,000 Feet

An advertising stunt that proved of some scientific importance was accomplished here recently when Arthur Dupont, local radio announcer, and Sydney M. Nesbitt, aeroplans club official, successfully established contact with a Montreal radio station while flying 3,000 feet over the city. Both men gave short addresses which were clearly received by many wireless fans. It was believed to be the first Canadian radio program broadcast from an aeroplane, though short addresses were broadcast from the airship R-100 over Ottawa in 1930.

Britain Is Providing Underground Airports

Planes Will Use Inclines To Come To Surface

Underground airports are to be provided for the British Air forces. This decision was made after it was found that no camouflage could hide the hangars from the powerful lenses now being used in military cameras. The new airbases will be at a minimum depth of thirty feet. There will be inclines for planes to come to the surface and take off.

Grow Seedless Grapefruit

Secret Was Originally Discovered By South African Ploverman

South African planters have mastered the secret of growing seedless grapefruit, and bulk supplies are now beginning to be exported. A careless ploverman discovered the secret originally. His blade came in contact with a grapefruit root and a small tree, growing from the incision, produced sterile (seedless) grapefruit. South African growers experimented and found that similar fruit could be produced only under special conditions.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety, that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

His Voice

Newstead was showing an office friend over the young couple's new house.

"All this luxurious furniture is my wife's idea, you know," he explained. The friend nodded approvingly.

"Very nice, I'm sure," he replied; "but surely you had a voice in the matter."

"Yes, the invoice," said the young husband.

Motion Without Motive

Chinese Description Of Western Civilization Fits Speed Maniac

Judging by the number of convictions in recent weeks, the Ontario authorities are in earnest in their determination to make the highways of that Province safe for the average motorist.

There is rarely any intelligent reason for driving a car beyond a reasonable speed. Occasionally, in an emergency, fast driving may be justified. For the most part it is merely craziness.

One of the most frequent causes of fast driving is the desire merely to pass some one on the way to nowhere in particular. Which gives point to the Chinese observer's description of Western civilization as "motion without motive." The speed maniac might just as well be driving around an enclosed motor speedway as on the public highways. Perhaps something of the kind may eventually be provided for those infected with the speed virus.—Winipeg Tribune.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective is mild.

"Too bad about Tom and the girl he's engaged too. Neither one of them is good enough for the other."

"Where did you get that idea?"

"I've been talking the matter over with both families."

Satisfy their 'tween-meals hunger with Christie's Premium Soda Crackers and milk, or jam, or spread, or peanut butter. They'll love them and so will you. Keep a package in the pantry all the time for soups, salads, desserts, quick lunches.

Crisp, light, flaky and slightly salted. Delicious.

Christie's PREMIUM SODA CRACKERS

First Results Obtained In Scientific Attack On Weeds In The Prairie Provinces

Weeds stand pre-eminent among the causes of agricultural losses in Canada and oddly enough they have been the last of the pests of agriculture to occupy the serious attention of scientific investigators, states a report entitled, "Weed Survey of the Prairie Provinces," issued as the first publication of the National Research Council's Associate Committee on Weed Control.

In a popular account, entitled, "Weeds and Their Control," prepared under the auspices of the Committee for general distribution and issued simultaneously, it is declared that the worst weeds are widely adaptable as to soil and climate and even recently settled areas such as the Peace River district are being gradually invaded and will eventually be overrun unless more effective defensive measures are adopted.

An estimate of the losses sustained is made:

"The committee's experiments have shown the wheat yield of weedy plots to be reduced by 19 to 44 per cent. Taking 18 per cent. as a conservative estimate of the crop loss due to weeds in the prairie provinces, this would run, at current prices for wheat, oats and barley, to well over forty million dollars for an average crop. To this must be added the high cost of the additional cultivation of the weeds, the cost of weeding within bounds, the cost of threshing, handling and shipping to Port Arthur and Fort William, annually the equivalent of 96 train loads of 60 cars each of weed seeds, the direct cost of dockage, and many other kinds of losses due to weeds."

Dr. Robert Newton, Director of the Division of Biology and Agriculture, National Research Laboratories, and the chairman of the committee, states in a foreword that cultural methods of control must be mainly depended upon, since the application of chemical herbicides is practicable only for small areas. Dr. Newton says:

"For most of the weeds fairly successful cultural methods have been developed, and we may expect great improvement along this line when we have available the results of the careful studies of the growth habits of weeds now being carried on by members of the committee. Previous progress has been achieved largely by the method of trial and error; now it can be based on accurate knowledge of the effect of different treatments on the development of various weeds. It would appear that general control may in future be achieved in proportion as educational campaigns are successful in inducing farmers at large to co-operate in the application of the best methods. Community effort is essential, as with many weeds reinfestation from farm to farm takes place readily."

"Weed inspection systems might be improved by centralizing with each province the responsibility for both the appointment and supervision of inspectors, and by extending the legislation to require the cleaning of the seed. Municipal appointees are often poorly qualified and ineffective. The educational aspect of the work should be emphasized."

"This report goes out as the first publication of the Associate Committee on Weed Control. A second, dealing in a popular way with weed control, in the light of the new information already available to the committee, is being published simultaneously. Other papers, based on the large volume of investigation work under way, will follow in due course. It is confidently expected that these will be recognized as important contributions to the solution of a problem of the first importance to agriculture."

G. F. McRostie, President of Agronomy, University of Manitoba; L. E. Kirk, Dominion Agrostologist, Dominion Experimental Farms, Ottawa; George Godel, W. G. Smith and J. M. Mason, weed investigators of the Saskatchewan Department of Agriculture, the Alberta Department of Agriculture, and the Associate Committee on Weed Control respectively, are the joint authors of the report entitled, "Weeds and Their Control."

The origin of the Committee is described in these terms:

"No such body of knowledge exists about weeds as about insects and plant diseases and insects, and until very recently no adequate investigations were under way to obtain such knowledge."

"In recent years the exploitation by commercial firms of various chemical agents as herbicides has provoked increased interest in this old, but never

widely used, method of weed control. The National Research Council, in response to requests from numerous organizations, called a conference in Edmonton in the fall of 1928, on the destruction of weeds by means of chemicals. At this conference it became clear that the whole field of weed control was urgently in need of investigation. The Council then appointed an Associate Committee on Weed Control, with representatives of the chief institutions concerned in the general problem, and the committee undertook the task of developing a co-ordinated programme covering all aspects of weed control investigations."

Having regard to the practicability of organizing the work, it was agreed that the initial investigations should have more particular reference to the prairie provinces. Mr. J. M. Mason, of the University of Alberta, was engaged by the committee to make a reconnaissance survey of this area, in order that the committee might have a better picture of the weeds with which it was confronted. The results of the survey are set forth in this report."

VARIOUS POINTS ABOUT THIS SMART DRESS HAVE BEEN THOUGHT OF FOR MATRONS

For instance, the one-sided softly falling rever cuts the bodice breadth. Still more helpful perhaps is the unbroken line, created by the partial belt arrangement, which gives height to the figure. The inset panel at the centre-front, also does its bit toward slenderness.

Printed crepe silk is a lovely medium. The vestee is lace. Style No. 438 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 4 1/2 yards of 39-inch with 3/4 yard of 10-inch lace. Cottons may also be used in sheer batiste or lace novelty weaves. Sheer woollens are also suitable.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap cloth carefully.

Belgian Memorial Stamps

Dedicated To Infantrymen Who Fell On West Front

Special postage stamps have been issued in Belgium, dedicated to the glory of the Belgian infantrymen who fought and fell on the Yser, at Nieuport, Dixmude, and other sectors of the Western front.

The design common to both of the two denominations consists of a giant figure of an infantry soldier clad in great-coat, steel casque, and full equipment, striding amidst a blaze of light through the ruins of a village. A total of 40,000 pairs was printed, and the stamps were sold at a premium upon face value in aid of the erection of a national monument in Brussels. Their values and colors are: 75 centimes (plus 37.25c) red; and 1f. 75c. (plus 4f. 25c.) blue. They make a notable addition to the many issues of stamps associated with the world war and its aftermath.

New Type Of Building

American Laboratory Constructed On Isles Of Georges Bank

A big laboratory recently built in America has been made on the lines of the thermos flask. Its walls are constructed to prevent heat from leaking either in or out. It is built entirely of concrete, with not a single window. Outside is a thick coating of cork with an outer layer of bricks. This acts as a heat insulator and maintains an unaltered temperature of 70 degrees. It would take a month in the depths of the severest winter for it to fall to 69 degrees. The purpose of the laboratory is to study the light given out by atoms at certain temperatures.

Dog Accepts Challenge

Careless with three banknotes Miss Peggy Tyson of Winchmore Hill, England, waved them playfully before her pet terrier. The dog accepted the challenge and chewed up the money. Miss Tyson was able to collect and match enough of the pieces to have the bills cashed at the local post office.

If Australia could be placed in the Atlantic Ocean, it would fill up all the space between the United States and Great Britain.

Vancouver Now Claims To Be The Largest Grain Shipping Port In The Dominion

One-Third World's Sheep Within Empire

British Dominion Produce Large Portion Of New Wool

Nearly one-half of the world's raw wool and over two-thirds of the wool entering world trade are produced within the British Empire. Exports of home-grown wool from Canada have developed rapidly since the war, these exports now amounting to a yearly average of 7,000,000 pounds, about 40 per cent of the entire Canadian production.

The world's sheep population is estimated at nearly eight hundred million head, of which about one-third are in the British Empire. They produce between 3,500 to 4,000 million pounds of wool yearly, and of this amount about 1,500 million pounds, including much of the best wool, comes from the Commonwealth of Australia, South Africa and New Zealand. Outside the Empire the important producing areas are the South American countries, the United States and Russia. Of these territories only South America has a surplus for export.

Thousands Use Plane For Channel Crossing

Demand Is Greater Than Accommodation According To Report

During June 4,311 travellers flew by Imperial Airways between London and Paris, as compared with 2,206 in the corresponding month of 1931. The increase is notable and it is reported that the demand is greater than the accommodation. When Louis Bleriot, the French aviator, made his pioneer flight across the English Channel, from Calais to Dover, a distance of 21 miles, in 37 minutes, on July 25, 1909, he had visions of the future of flying, but he could hardly have imagined that the science would make such tremendous progress in less than a quarter of a century. —Montreal Gazette.

STAND OF DOUGLAS FIRS

Stand of Douglas Fir on Vancouver Island, British Columbia. There are 127 billion feet of this timber growing on Vancouver Island.

When somebody said that trees were a thousand friends in one to the people of the world, it is for this reason that Mr. Frank D. Barnum is carrying on a Dominion-wide crusade for the conservation of our Canadian forests. The above picture shows a handful of Douglas firs near Victoria. There are estimated to be over 120 billion feet of this timber growing on Vancouver Island. Mr. Barnum has already bought a large tract to be preserved for the public in his fight for the conservation of our timber.

Mr. Barnum says: "Trees protect and beautify our farms and gardens, protect our drinking water supplies, our water powers, fish, game and bird life; provide lumber and fuel, pulp and paper, labor and transportation, taxes and dividends; are our greatest

promoter of health, beautify our city streets, protect our highways and check the ever growing menace of dust storms and hail, provide shelter from the scorching days of sun in summer and the icy blasts of winter, prevent cyclones, damaging floods, erosion and loss of fertility of the soil; provide recreation, and a tourist industry which, without cost to the country, ranks second in its importance, hence, including lumber and pulp, our four greatest industries are absolutely dependent upon our forests, and in fact nothing that we use or eat or wear can be produced, manufactured or transported without the aid of wood."

"No other element of the universe has so many uses (4,500 in number), or is of such vital importance as trees."

The surprising growth of Vancouver's grain trade during the past ten years was summarized and clearly illustrated by R. C. Milroy, retiring president of the Grain Exchange division of the Vancouver Merchants Exchange. The occasion was the annual meeting of the division.

For the fourth successive year Vancouver has exceeded Montreal in exports of Canadian wheat. Then years ago Vancouver exported 8,000,000 bushels, while Montreal shipped 84,000,000 bushels of Canadian wheat. Last year 1931-32, Vancouver exported more than 75,000,000 bushels of wheat and Montreal 54,500,000.

Ten years ago Vancouver's elevator accommodation was 1,500,000 bushels. Today, including additions now under construction, the port has the largest ocean grain elevator accommodation in the world, with 17,728,000 bushels. Montreal is second with 15,162,000 bushels.

In 1921-22 Vancouver exported 6 per cent of the Canadian wheat crop. In 1931-32 this port exported 44 per cent of the Canadian wheat crop. Montreal and other eastern Canadian ports 37 per cent, and United States ports 19 per cent.

Ten years ago Vancouver's oats export was 250,000 bushels; last year it was 7,000,000 bushels.

Ten years ago this port's grain export to Europe were 4,500,000 bushels; last year it totalled 71,000,000 bushels.

Last year's export from Vancouver was 84,000,000 bushels of all grains, second highest movement in history of the port. Records were made in quantity shipped to Europe, in movement of oats, in total percentage of Canadian crop exported.

Something New For Chicago World's Fair

Various Stages Of Manufacturing Taking Place Of Completed Exhibit

Chicago World's Fair in 1933 will be built on the theory that the "still exhibit" of previous expositions is out of vogue. Every exhibit will be in "motion." Instead of completed products on display, the public will be shown the various stages of the manufacturing. Because of this policy there will be thousands of employees working on regular shifts in temporary factories during the six months period of the Fair. It is expected that 30,000 persons will be on the payroll of the various manufacturers, exhibitors and educational displays.

Fresh Water Leviathans

Larger Boats Make Faster Time On Lake Trips

In only a few years over the century Welland locks have grown from 110 feet long to 859 feet, because Canadian business requires to handle its boats that have grown from 100 feet to 820 feet. Moreover these freshwater leviathans that we have made to carry our wheat and ores can no longer spare the time to dawdle away 25 hours between Erie and Ontario as they have had to do. Speed goes with size nowadays and our newest and biggest carriers with their 25,000 tons under hatches can pass from lake to lake and clamber up or down the cliffs in a third of the time. —Montreal Star.

"Lend me five pounds."
"When I return from Paris."
"So you are going to Paris?"
"No." —Gutteries, Madrid.

WORLD HAPPENINGS BRIEFLY TOLD

Robert Moodie, 67, who had been for nearly 40 years connected with the circulation side of the "News of the World," being its senior representative in the South of England, is dead.

Dr. John Stanley, junior research investigator on the staff of the National Research Laboratories, formerly of Vancouver, B.C., has resigned. He has accepted the post of assistant professor of biology at Queen's University, Kingston.

A royal robe of sealskin, ornamented with ermine, to be worn on state occasions only, has been ordered by the emperor of Ethiopia from a firm of Montreal furriers. His majesty insisted the order be placed "within the empire."

The order of the Red Star, the highest decoration of the Soviet government, has been awarded to Col. Hugh L. Cooper, United States engineer, for his work on the huge Dniepropetrovsk power development in southern Ukraine.

Having kept a census of horses since the World War, the British War Office will start one of automobiles.

Apartment built in Greater Copenhagen, Denmark, last year, totalled 6,522, the largest number ever recorded in any 12 months.

No change is to be made in the size of Canadian one dollar bills, the finance department stated recently. Recent rumor said the Canadian bill would be cut down in size, much after the style of the smaller United States bills.

British Columbia's oldest pioneer, Alexander MacLean, aged 83, who came to British Columbia 74 years ago and whose memories went back to the days when the site of Vancouver was dense forest, is dead. He was born in San Francisco.

Liner Card-Sharper's Have Lost Occupation

Practice Is Almost Unknown Now On Atlantic Bots

In many of the world's big cities today, including London, England, are the scattered bands of clever and well-educated men who at one time were expert card-sharpers on the great luxury liners.

The depression, which brought about a scarcity of easy money, helped the police in their vigorous campaign against these men, who specialize in card-sharping aboard ships.

Their expenses were high, and the stakes at most of the games were too low to produce any profit after paying their fares as first-class passengers.

Card-sharping on the Atlantic liners is today almost unknown.

Why argue? If you are right, you learn nothing. And being wrong makes you so mad you don't want to learn.

Visitor says American schoolgirls are too fond of gum. Part of their chawtion, no doubt.

SUNDAY SCHOOL LESSON

SEPTEMBER 11

ISRAEL JOURNEYING TOWARD CANAAN

The Start From Sinai, verses 11-28. The children of Israel had left Egypt an undisciplined rabble. Now they are an orderly host—they set forth according to their journeys. In due order they advanced, first the camp of Judah, and then the other tribes in their prescribed order, the ark and the tabernacle and all its furnishings in the care of those appointed for this service. They were on the way to "the place of which the Lord said, 'I will give it to you,'" unaware as yet that more than thirty-eight years would pass before their descendants, not they themselves, would enter that Promised Land.

"The path of life we walk today is strange as that the Hebrews trod; We need the shadowing rock as they; We need, like them, the guide of God."

The Proposal To Hobab, verses 29-32. Hobab was Moses' brother-in-law, according to Judges 4:11, the son of Jethro, who had visited Moses at Sinai and had returned to his home, Exodus 18:27. Before starting on the march Moses brought Hobab to go with them. "Come thou with us, and we will do thee good," he said with confidence, assured that God would be with them, and that the good which would come to them from God they would share with Hobab. Moses was right in telling Hobab that they would do him good. "Unprogressive, out of the way of the great movements of humanity, guiding nothing as generations went by, but simply reproducing the habits and treasuring the benefits of their fathers, Hobab's Arab tribe had no prospect, no future. Compared with that poor outcast, how good would be to share with him the noble task of establishing on the soil of Canaan a nation devoted to truth and righteousness, in league with the living God, destined to extend His kingdom, and make His faith the means of blessing to all!"—Robert A. Watson.

Can you truthfully say to others that they come with you, you will do them good? Are you high-minded and true, so that your association with others will help to elevate and ennoble them?

Indications More Favorable

Better Tone Said To Prevail Business Circles

Although no definite improvement has yet appeared in the volume of Canadian trade, a better tone pervades business circles and greater activity is in sight, according to a business summary of the Bank of Montreal.

Full average crops are assured, says the report. Wheat crops in the prairie provinces will run 100,000,000 bushels more than last year and low harvesting costs will be helpful to farmers and all branches of business. Except for hay, crops in other provinces are excellent. Livestock prices are low but marketings are large and the dairy industry maintains a normal output with recent advances in the price of cheese and butter.

Most manufactures continue slight but shipping is better than last season; more grain has passed through Montreal; more British coal is being imported and a stronger autumn business is expected.

The report points to the general hardening of commodity prices as an encouraging sign. Export trade for July was higher than in any month since December. Imports were down, increasing Canada's favorable trade balance.

More confident feeling with a rise in commodity prices is reported for both the United Kingdom and the United States.

Ontario Relief Organization

Public Welfare Board For Each Municipality To Handle Direct Relief

Organization of a public welfare board for each municipality to administer direct relief is recommended in the report of the advisory committee on direct relief to the Ontario Government, and announced by Hon. Dr. J. D. Monteith, Minister of Public Works and Labor. Where possible, it is also suggested that an association or league of organizations interested in public welfare should be organized to act in an advisory capacity and arrange for the conduct of campaigns in connection with the raising of funds, etc.

Increase Shown In Canada-Empire Trade

Statistical Review Issued By Department Of Trade And Commerce
Canada is becoming more empire conscious in her purchases.

A statistical review, issued by the Department of Trade and Commerce, showed that nearly 30 per cent. of the Dominion's imports in July came from empire countries as compared with only 26.3 in the corresponding month last year.

The percentage of foreign imports dropped from 73.7 per cent. in July to approximately 70 per cent. Compared with the preceding July, Canadian imports last month from foreign countries registered a drop of \$10,621,346, while those from empire countries decreased by only \$2,900,000.

In July Canada wrested from the Netherlands second place amongst countries of the world in supplying the cheese market of the United Kingdom. British trade figures, the Dominion Bureau of Statistics reports, show that the leading importations were: New Zealand, 16,602,208 pounds; Canada, 12,286,288 pounds; and Netherlands, 11,384,656 pounds.

There was a sharp advance in the importation of Canadian canned salmon by the United Kingdom in July. British trade figures give the amount as 1,726,928 pounds as compared with 488,872 pounds a year ago. The United States supply last month was 465,984.

Iceland has 1,805 automobiles.

Secure Animal Pictures

American Nature Association Party

Meet With Success In Rockies
After four weeks on the trail along the northern boundary of Jasper National Park and the adjacent mountains of British Columbia, the American Nature Association party returned to Jasper Park Lodge with several thousand feet of big game motion picture films.

Under the leadership of Arthur N. Pack, Princeton, N.J., president of the association, the party included Laurence S. Rockefeller, Tarrytown, N.Y., son of J. D. Rockefeller, Jr.; Mrs. Pack and Mr. and Mrs. Robert W. Bryan, Jr., all of Princeton.

Some novel stalking was a number of the shots for the camera crew. Wearing white costumes with hoods, Mr. and Mrs. Pack aroused sufficient interest among the ordinarily suspicious goats to approach within a few feet of them on one occasion. In the Tonquin Valley the party discovered a herd of more than 100 caribou and acquired some fine close-ups. Later, in the Snake Indian River country, they ran across practically every kind of game in the Canadian Rockies.

"I got one fine Billy," said Mr. Pack, "by dropping on hands and knees and imitating him when he lowered his head and stamped his foot to show anger. We exchanged boasts and compliments until I had crawled to within ten feet of him. Then he took to his heels and all made a fine picture."

A Worth-While Idea

Here's a little idea worth keeping tucked back somewhere in your mind. Remember that it is always a good plan to remove the spare from the rack in the rear or out of the fender well before jacking up the car to take off the flat. Otherwise, in getting the spare loose the car may be shaken enough to cause it to slip off the jack.

Erosion taken 21 times as much plant food from the field and pastures of America as is removed by harvested crops.

Bad Constipation And Sick Headaches Ended By Vegetable Pills

Formerly a wreck from Constipation, Sick Headaches and Indigestion, Mr. V. H. writes: "It was a red-letter day for me when a friend recommended Carter's Little Liver Pills. Results have been marvellous." Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Acidity, Biliousness, Poor Complexion and Indigestion. 25c. & 76c. red boxes. Ask for Carter's by NAME.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework, it is only natural that a worthwhile substitute for the dusty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually dusts—as it cleans—as if polished is receiving a hearty welcome from Canadian women who detest dust cloths and all they stand for. Wonder Paper is made from clean rag and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft wad, and mop over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floor.

And when you're through—throw it away. No duster to shake out or wash. No bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous PARASANI heavy waxed paper in Green Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If you desire a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd.

Enclosed find 25c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Left-overs."

EXPLORE WAYS AND MEANS TO AID THE FARMER

Toronto, Ont.—Hon. Robert Weir told the national conference of agricultural officials here that the United Kingdom had decided at Ottawa to protect her own farmers against competition in poultry and dairy products from European countries, and to give the Dominions and Colonies an advantage.

At present said the Federal Minister of Agriculture, Empire countries supply only 30 per cent. of the eggs consumed in the United Kingdom and less than 25 per cent. of dressed poultry.

The present "spread" between what the consumer pays and the milk producer gets can be reduced, declared Dr. J. S. Booth, commissioner of agricultural economics, Ottawa. In his opinion a 35 or 40 per cent. spread was too much. "I submit," he added, "that work on the question of reducing costs which absorb 75 cents out of the consumer's dollar is a field inviting some consideration."

J. S. Singleton, Dominion Dairy Commissioner, told the conference the farmer's greatest opportunity now lies in the direction of concentrated milk products. At present, he explained, the United Kingdom imports 320,000,000 pounds of such product, of which only 8.6 per cent. is contributed by Empire countries and 1.6 by Canada.

The conference appointed special committees on bacon, beef production, poultry, dairy herds, dairying, health of animals, cereals, fruit and vegetables, pasture and forage, marketing and publicity. Their purpose is to discover ways of helping the farmer secure a better return for his efforts.

Free State Imposes Duties

Duties On Sheep and Poultry Aimed To Help Home Industry
Dublin, Ireland.—Duties on sheep and poultry imported into the Irish Free State were announced by the government as a further encouragement to home industry.

A duty of 11 shillings and three pence (\$2.70) per head will be imposed on all sheep and three shillings (72 cents) on all poultry imported by the terms of the order which was issued under the Emergency Duties Act. Two-thirds of the full rate is applicable as a preferential rate in the British Empire and the United Kingdom.

The duties are not directed against the United Kingdom as the imports of sheep and poultry from there are negligible. The main trade is carried out between the Free State and northern Ireland.

Economy Move

Abolition Of Eleven High Positions On C.N.R. Is Announced

Montreal, Que.—Abolition of 11 high positions in the traffic department of the Canadian National Railways is announced. The abolition of positions and economies thus brought about are effective September 1.

These changes and economies include reorganization of duties and the retirement of former officers of the traffic department whose combined service to the Canadian National system and its component parts totals 117 years.

The positions abolished include: Assistant freight traffic manager, Winnipeg; J. M. Horn, hitherto assistant freight traffic manager, Winnipeg, is now appointed general freight agent, Winnipeg, with S. W. Hately as assistant general freight agent, and F. G. Adams as chief of traffic bureau.

Flyer Sets New Record

Floyd Bennett Field, N.Y.—A new speed record for United States transcontinental flying was set when Capt. James G. Hazlip, winning the cross country derby to Cleveland, flashed on to New York in an elapsed time of 10 hours, 19 minutes from Los Angeles. Flight on his fall was Captain Roscoe Turner.

W. N. U. 1958

World's Grain Show

Twenty-Eight Nations Are Expected To Take Part

Toronto, Ont.—Twenty-eight nations are expected to take part in the world's grain show at Regina in 1933, Hon. W. C. Buckle, Saskatchewan Minister of Agriculture, told the national conference of agriculture officials here.

"The crop in western Canada this year is the second largest we ever grew," declared Mr. Buckle. "With anything like a fair price I am confident the support to this show will assure its complete success."

Mr. Buckle pointed out that Canadians will have a chance to win all the prizes offered except those for rice. The show has been financed on a contributory basis by the Federal Government, the Saskatchewan Government and the city of Regina. Already \$200,000 has been spent on a building to house the show, and a prize list of \$103,700 has been prepared. Other provinces will be asked to make some contribution towards expenses. The whole country stood to benefit from a show of world-wide importance, said Mr. Buckle.

Livestock judging will probably be added to the competitions. Preliminary campaigns had interested so many farmers in bettering their products that Mr. Buckle felt the show had already justified itself.

Elaborate arrangements have been made to bring special excursions to Regina, including Canadian parliamentaries and delegations of Australian and United Kingdom farmers.

St. John's College Will Remain Open

Salary Cuts Have Been Voluntarily Accepted By Staff

Winnipeg, Man.—All 15 endowment funds of St. John's College and school, designed almost entirely for the teaching work, have been virtually wiped out, but the historic college and school, the first institution of its kind established west of the Red River, will carry on as usual this year, according to announcement of the college council.

Continuing the work of St. John's College and school has been made possible by voluntary acceptance by the teaching staffs of stringent salary cuts, the council stated, and the hope was expressed that Church of England people in Winnipeg would give full support to this undertaking by sending their young people to the institution.

The bursar's fund and scholarship funds, it was pointed out, were used to help needy and worthy students to get their training in college. Many of these will be kept out of college this year through impairment of college assets.

Abandons Channel Swim

Dover, England.—Only a mile and one-quarter off Dover, A. C. Kaanar, 20-year-old English seminary student, was forced to abandon his attempt to swim the English Channel. Kaanar had been 14 hours in the water, having taken off from Cape Gris Nez, France. He had to quit because of a storm.

Grain Speedily Handled

Montreal, Que.—The loading of 9,428 long tons, approximately 352,000 bushels of wheat, into the steamer "Anglo African" in seven hours 15 minutes is stated to be a new record for speedy handling of grain in the port of Montreal. Four spouts were used to pour the grain into the vessel.

Thinks Bonus Will Help

Toronto, Ont.—"The Ottawa Economic Conference has undoubtedly helped us, the wheat bonus should help us and things generally seem to be looking a little better," E. W. Beatty, K.C., president of the Canadian Pacific Railway, said on his arrival here.

Keep Cotton Off Markets

Washington.—A \$50,000,000 fund was available to keep government-controlled cotton off the market until 1933. For six or seven months, at least, all sales would be halted under a plan devised by the farm board and financed by the reconstruction corporation.

SUCCEEDS KREUGER

Bjorn Prytz, Stockholm industrialist, who has been selected by creditor concerns to be president of the International Reconstruction of the Swedish "Match Company," of which the late Ivar Kreuger was head. He will attempt to settle up the affairs of the concern, which was the largest of its kind in the world before Kreuger's suicide bared its straits.

Prefers Northern Port

Steamship Captain Says Churchill Easier Port To Reach Than Montreal

Churchill, Man.—"I have hundreds of friends and associates in Montreal, but in fairness I must tell you that I much prefer to sail into Churchill than into Montreal. You can sail in here without fear or worry and that more than you can say for Montreal. We had a wonderful passage. We are glad to get the business."

This was the statement of Capt. G. Blacklock, commander of the S.S. Silkworth, Newcastle, who arrived here to head what for the United Kingdom.

Canadian Author Drowned

Raymond Knister Widely Known As Successful Writer

Windsor, Ont.—Raymond Knister, 32, of Toronto, was drowned near Stoney Point in Lake St. Clair. Knister was swimming and it is believed suffered a heart attack. He was a son of the late Robert Knister and widely known as a writer.

He wrote two novels, "White Narcissus" and "My Star Triumphant," a novelized life of Shelley which won the \$2,500 prize offered by an Ottawa publishing firm in 1931.

A SHIP THAT WILL NEVER RETURN

Dedication of the "Southern Cross" by the Archbishop of Canterbury at Greenwich, London, England, was a very colorful ceremony. The "Southern Cross" is a Church of England vessel, built at a cost of \$100,000 as the headquarters of the Bishop of Melanesia. She will sail from London for the Melanesian Islands in the Southern Pacific Ocean never to return. It is to work among the sick and suffering in the islands. Above is a general view of the ceremony in the stern of the boat.

Market For Wheat

Revival Of Dominion's Wheat Sales To France Is Expected

Paris, France.—Fifty thousand bushels of Manitoba wheat imported into France during the past week will be milled and re-exported to the French colonies, thereby evading the maximum tariff applied to Canadian wheat since the expiration of the Franco-Canadian commercial accord. Normally, this wheat would cost the importers \$2 a bushel in customs duty in addition to the depreciated currency tax of 11 per cent. However, because French millers guarantee its re-exportation to the colonies, they pay only the Winnipeg market price. It is stated that additional similar orders are being placed for Canadian wheat, which means a revival of the Dominion's wheat sales to France at a time when the French maximum tariff seemed to have killed the grain trade to this country.

The French colonies import millions of quintals of flour annually, and in this connection it is foreseen that Canada may secure a rich market on account of the superiority of the Manitoba over French native wheat, which the colonies have previously imported.

Review Of Empire Naval Defence Urged

Australian Minister Of Opinion Time Is Now Opportune

New York.—A despatch to the New York Times from Melbourne, Australia, says "Sir George Pearce, Commonwealth Minister of Defence, commenting on the suggestion that former Premier Stanley Bruce, while in London, England, would discuss naval defence with the British authorities, said the time was opportune for a review of empire naval defence."

He declared the Ottawa conference had laid down a basis for empire trade which must be carried by sea-borne traffic, therefore the question of empire naval defence called for a new orientation.

The present defences, Sir George said, could not by any stretch of the imagination be said to be satisfactory for such a widely scattered empire.

Clever Surgical Feat

Vienna.—Rudolf Datschmal, 11-year-old boy whose heart was pierced by three bird shots in a hunting accident was reported recovering after a remarkable surgical feat by Dr. Gustav Feleisch of the University of Vienna. The surgeon sewed up the wounds in the still beating heart and later removed the shot from the wounded lad's other organs.

EMPIRE TRADE HAS RECEIVED A NEW IMPETUS

Port William, Ont.—Had it failed, the Imperial Economic Conference would have assumed the proportions of a catastrophe. Instead, its successful consummation marks a tremendous step forward toward increased trade and prosperity within the British Empire, for it has laid the foundations of a commercial structure upon which the nations now have the opportunity as they never had before to build an enduring monument to progress and prosperity.

Addressing nearly 1,000 of his constituents here on the probable results of the economic parity, Hon. Dr. R. Manion, Minister of Railways and Canals, and liaison officer of the conference, summed up the agreements made by the representatives of the British nations at the historical deliberations at the Canadian capital.

Expressing complete confidence in the ultimate advantages to increased Empire trade as represented in the Ottawa agreements, the minister counselled against expectation of immediate results. The trade trend upward will be gradual, he said, but none the less certain.

Partly as the result of the conference and partly the result of an apparent improvement in economic conditions in Canada, optimism is general again in this country for the first time in three years. This changed psychology is a most encouraging and hopeful sign, he said, indicating that Canada may not have long to wait for a pronounced movement along all lines toward prosperity.

Conference Starts Work

Agricultural Experts Get Down To Business At Toronto

Toronto, Ont.—Dividing into committees for intensive work, Canada's first conference of agricultural experts, federal, provincial and academic, summoned by Hon. Robert Weir, Minister of Agriculture, grappled with the farmer's greatest problem—how to make farming pay when prices are low.

A national advisory council to continue the work of co-ordination, was advocated by Mr. Weir at the opening session, and possibly provincial councils to deal with problems of purely provincial importance. Agricultural organizations, he contended, should join forces rather than work separately on the same problems.

S. E. Todd, secretary of the Industrial Council of the Canadian Meat Packers' Association, announced that he would pack his horses to permit government inspectors to inspect hog carcasses "on the rail" in the abattoirs. This concession is expected to help Canada in the United Kingdom market against competition from Denmark, where bacon producers have for some time enjoyed the advantage of government inspection in the killing plant.

Plan Has Collapsed

Iowa Farmers Allow Produce To Enter Des Moines

Des Moines, Iowa.—Farm produce was brought unhindered into Des Moines with the collapse of the last strong farmers' holiday picket line.

Staff Charles F. Keating, a force of deputies, and truck drivers, armed with clubs, massed on highway 65, north of the city, and forced their way through members of the Farmers' Holiday Association, who seek to force higher agricultural prices by keeping produce from the markets. The "big push" against the blockade, after starting at a point five miles from Ames, resulted in the free movement of produce into this capital city.

Employees Get Bonus

Chicago.—The brokerage firm of Zittinger and Brand announced that employees would be paid a 10 per cent bonus for the month of August. The staff earned it, officials announced, because business was so good they had to work overtime.

Stony Plain Sun.

Published Every Thursday at the

15c line first insertion; 10c line
each subsequent insertion.

The Mark-Time Scholar.

Calgary school board, in part at least, proposes to deal with the problem of the high school student who is merely filling in time at classes and whose ambition seems to be to arrive nowhere in particular, says the Herald. Those pupils who failed to pass a minimum of five subjects last term will have to make special application to their principals and the high school superintendent before they are allowed back again. Entered for the new term they will be permitted to take no more than five subjects and in these they must make progress satisfactory to their teachers, principals and superintendent, as shown by monthly reports. Failing to do this, they may be suspended, habitual neglect of duty being an offense calling for suspension. The school board is to be commended for having in this way undertaken to rectify a most undesirable state of affairs.

And Now It's the Semagraph

The Semagraph, invention of Buford L. Green, Charlotte, N. C., sets six lines of type a minute direct from copy written by reporters on a special typewriter. The device will take care of short lines, eliminations of portions of lines and other corrections of the general nature which copy-readers may make. One machinist will be able to watch an entire battery of these machines. A large array of publishers have witnessed the trial of the machine, and it won't be long before there will be some thousands of Lino operators unable to find work. The Semagraph will have appropriated their jobs.

Suicide Follows Losses.

In the spring of 1929, when the shares of Kreuger & Toll Match Co. were selling around \$47 a share, life looked pretty good to Ivar Kreuger, but when they took a fast ride down hill to a place where they're worth about 50c, he put a bullet thru his heart and ended it all. The suicide of Mr. Eastman, the kodak millionaire, is also to some extent traceable to his huge losses. These suicides show how foolish it is to spend the years of life toying with money and looking upon it as the great desideratum, when the Real Life lies along a different path.

Smoke Up!

While accurate statistics are difficult of compilation, the Moody Investment Service and other statistical bureaus estimate that women are now smoking 12 p.c. to 14 p.c. of the cigarettes now smoked in America, or, in other words, are disposing of some fifteen billion of these annually.

Heard on Main Street.

"Say, Bill, if you had five bucks in your pocket, what would you think?"

"I'd think I had somebody else's pants on."

Hansen's Corners.

The wild geese are coming South. So look out for winter!

Farmers here are practically all thru harvesting.

There will be an election for a new trustee for Hansen Corners S. D. to fill the vacancy created by the resignation of Trustee Clausen, who is said to be leaving on a trip.

Mr. McDonald is said to have let the McPhee farm to a newcomer family by the name of McDonnell. The family is said to comprise of a large number of members.

The Retort Courteous.

In a newspaper in a Southern Alberta town the following advertisement appeared one week:

The Man who picked up my Wallet on Main St. was more concerned; he is requested to return it and avoid unpleasantness.

The next week this reply appeared in the paper:

The Recognised Man who picked up the Wallet on Main St. requests the loser to call at any time and collect it.

Radio's Latest and Best

The latest in Radio arrived in Stony on Saturday last, when a new design 9 tube de Forest Crosley model was shown at the Stony Plain Hardware. The new design is called the Mayfair, and has embodied in it several new features, including a color-tone power control, and a silencer which cuts out static and other noises. This model gives you the choice of the electric or the battery systems. "Selectivity and sensitivity" have been applied to radio machines for several years, but in this newest model the term "selectivity and sensitivity" has a real meaning.

No More Cattle Guards.

At one time many citizens in towns and cities kept their own cows. The small boy drove the family milkster to and from the pasture morning and evening. Cattle were met with frequently along thoroughfares of most municipalities. They picked up grass along the roadway.

Suitable unto the needs of the time, the railway companies were compelled to erect cattle guards wherever their lines crossed a street. These are to be found today, wooden slats painted white, fixed at angles that would discourage the most venturesome bossie from leaving the highway and wandering along the tracks where she might be killed. The other day official cognizance was taken of the fact that times have changed. The old order passeth and in its place the Board of Railway Commissioners has enacted as follows:

It is ordered that all railway companies subject to the jurisdiction of the Board be and are hereby relieved from erecting and maintaining cattle guards at highway crossings in cities and towns.

Our Good Postoffice Service.

If anyone ever tries to discredit the Canadian Postal Service again refer them to the receipt of a letter at Kamloops containing the weirdest ever known in local history. A few days ago the superintendent of the Canadian National Railways at Kamloops brought his eyebrows together with a click when he looked over his mail and found a letter addressed as follows: "PROVINCE OF BRITISH COLUMBIA Kamloops. WESTERN DISTRICT, NORTH SASKATCHEWAN, MANITOBA. ONTARIO. CANADIAN NATIONAL RAILWAYS. SECOND MANAGERS OFFICE, CANADA." This was all printed in capital letters and covered the entire front of the envelope. When the letter was opened it contained a request from a resident of Dubuque, Iowa, for information regarding the city of Kamloops. The request was turned over to the Board of Health who sent illustrated booklets to the writer, but envelope was kept as a souvenir. Which only goes to prove that the Canadian mail service delivers letters correctly despite the address.

Church Services.

German Lutheran services will be held in Stony Plain next Sunday at 10.30 a. m.

Services in St. Philip's Church next Sunday, 11.00 a. m.

United Church service every Sunday Evg. at 7.30.

On Sunday Sept. 18 there will be Lutheran services at St. Matthew Schoolhouse at 7.30 p. m., by Rev. H. Kuring.

REPAIR WORK!

All Kinds of Carpentering, Plastering, Brick Work and Repair Work on Buildings.

Mr. Val. Pailer,
Stony Plain.

THE GREAT CANADIAN VALUE

THESE REASONS

make it wiser than ever
TO CHOOSE THIS SIX TODAY!

1 Chevrolet pioneered the six-cylinder engine in the low priced field because this is the one type of power plant that strikes a perfect balance of smooth performance and maximum economy. It is necessary to have six cylinders to get multi-cylinder smoothness.

2 Drivers of sixes never want less; and anything more than six cylinders means a sacrifice of economy! The Chevrolet Six costs less to operate than any other full-size car. Naturally, more than six cylinders would mean greater expense for gasoline, oil and upkeep.

3 The 1932 Chevrolet Six is a proved car. It represents the fullest development of the basic multi-cylinder principle which has resulted in highest satisfaction to more than 2,000,000 Chevrolet Six owners.

4 The Chevrolet Six is the lowest priced car combining Silent Syncro-Mesh shift and Free Wheeling.

5 Bodies by Fisher are exclusive on Chevrolet in the lowest price field. Fisher hardwood-and-steel construction is the safest and most durable.

6 New, reduced prices and easy terms over a period of months. Immediate delivery of any model.

7 The Chevrolet motor is mounted on thick rubber blocks, utilizing the most modern and efficient method of preventing vibration.

8 109-inch wheelbase. Strong frame. Four long springs, with four Lovejoy shock absorbers.

9 Stabilized front fender design. Insulated driver's compartment. Fisher non-glare VV windshield, easily adjustable with one hand for ventilation.

10 Down Draft Carburetion with heat control. Harmonically balanced, counterweighted crankshaft.

11 Powerful, enclosed four-wheel brakes. Separate emergency brake system.

12 Built in Canada, of Canadian materials by Canadian workers.

THREW AWAY HIS STICK

When Sciatica Yielded to Kruschen

There can be no doubt that this man has finished walking with a stick, for it is now three months he has discarded it.

He writes: "For 18 months I suffered with chronic sciatica and rheumatism, and was unable to walk without the aid of a stick. But after taking Kruschen Salts for a short time, I was able to throw away the stick. It is now four years since this happened, and I have had no return of the complaint, and have not lost a day from work. I shall never be without Kruschen Salts, as they are worth their weight in gold. You can use this letter as you please, as I can honestly recommend Kruschen Salts to any sufferer."—C. F.

If the eliminating organs become sluggish, they permit harmful uric acid to accumulate and deposit itself in the tissues, muscles and joints in the form of needle-pointed crystals, which, piercing the nerve sheaths, cause excruciating pains of sciatica. The six salts in Kruschen stimulate the eliminating organs to healthy, regular action. Mischievous uric acid is then given no chance to collect.

THE HOUSE OF DREAMS-COME-TRUE

—BY—

MARGARET FIEDLER

Author of "The Splendid Policy," "The Herald of the Far East," "Hobbes & Sloughs, Ltd., London."

CHAPTER XXXI.—Continued

She made no pretence at mourning the man who had turned her life into a living hell for nearly three years and who had stood like gaoler between her and the happiness which might have been hers had she been free. But the conventions, as well as her own feelings, dictated that a decent interval must elapse before she and Nick could be married, and this would be for her a quiet period dedicated to the readjustment of her whole attitude towards life.

"The length of that period was the subject of considerable discussion. Nick protested that six months was amply long enough to wait—too long, indeed—but Claire herself seemed disposed to prolong her widowhood into a year.

"It isn't in the least because I feel I owe it to Adrian," she said in answer to Nick's protest. "I don't consider that I owe him anything at all. But I feel so battered, Nick, so utterly tired and weary after the perpetual struggle of the last three years that I don't want to plunge suddenly into the new duties of a wife. I don't even into new happiness. It's difficult to make you understand, but I feel just like a sponge which has soaked up all it can and simply can't absorb any more of anything. You must let me have time for the past to evaporate a bit."

But it required the addition of a few commonplace observations on the part of Lady Anne to drive the nail home.

"Claire is quite right, Nick," she told him. "She is temporarily worn out—mentally, physically and spiritually spent. Her nerves have been kept at their utmost stretch off and on for years, and now that release has come they've collapsed like a fiddle-string when the peg that holds it taut is loosened. You must give her time to recover, to key herself up to normal pitch again. At present she isn't fit to face even the demands that big happiness brings in its train."

So Nick had perforce to bow to Claire's decision and it was settled that the first month or two, at least, of her widowhood Jean should remove herself and her belongings from Staple and bear her company at Charmwood. And meanwhile Nick and Claire

would spend many peaceful hours together of quiet happiness and companionship, while Claire, as she herself expressed it, "rebuild her soul."

To Jean the issue of events had brought her nothing but pure joy. Her belief had been justified, and the grim gateway of death had become for these two friends of hers the gateway of happiness.

She had neither seen nor heard anything of Burke since the day she had fled from him on the Moor, although indirectly she had discovered that he had quitted the bungalow the day following that of her flight from it and had gone to London.

Judith saw there a brief, rather formal letter of congratulation upon her engagement, but in it she made no reference to him nor did she endeavour to explain away or palliate her own share in his scheme to force Jean's hand. Probably an odd kind of loyalty to her brother prevented her from clearing herself at his expense, added to a certain dogged pride which refused to let her extenuate any action of hers to the daughter of Glyn Peterson.

But none of these things had any power to hurt Jean. In her new-born happiness she felt that she could find in her heart to forgive anybody anything! She was even conscious of a certain tentative understanding and indulgence for Burke himself. He had only used the "primitive man" methods his temperament dictated in his effort to win the woman he wanted for his wife. And he had failed. Just now, Jean could not help sympathizing with anybody who had failed to find the happiness that love bestows.

She reflected that the old Cyprian on the Moor had been wonderfully correct in her prophecy concerning Nick and Claire. The sun was "shining but not" for them at last, just as she had assured them that it would.

And, with the same, came a sudden clutch of fear at Jean's heart, like the touch of a strange hand. The gipsy had had other words for her—harsh, er, less sweet-sounding.

"For there's darkness comin' . . . black darkness."

She shivered a little. She felt as though a breath of cold air had passed over her head, chilling the warm blood that ran so joyously in her veins.

CHAPTER XXXI.

An Unwelcome Visitor

Blaise was seated at his study table regarding somewhat dubiously a letter which lay open in front of him.

It was written in a flowing, foreign hand and expressed with a quantity stilted, un-English turn of phrase. The heading of the note paper upon which it was inscribed was that of a hotel in Exeter.

"Dear Mr. Tormarin," it ran. "You will, without doubt, be surprised to receive a letter from me, since we have met only once. But I have something of the most importance to confide to you, and I therefore beg that you will accord me an interview. When I add to this that the matter approaches very closely the future of your fiancée, Miss Peterson, I do not doubt to myself that you will appoint a time when I may call to see you."

The letter was signed M. de Varigny.

Blaise had received this thought-provoking epistle two days previously, and had been impressed by an uncomfortable consciousness that it foreboded something unpleasant. He could not imagine in what manner the affairs of Madame de Varigny impinged upon his own, or rather, as she seemed to imply, upon those of his future wife, and this very uncertainty had impelled him to fix the interview the Countess had demanded at as early a moment as possible. Disagreeable were best met and faced without delay. So now he was momentarily awaiting her arrival, still unable

It does pay to "ROLL YOUR OWN"

From the standpoint of economy—each 20c. package of Turret Fine Cut contains the makings for at least 50 cigarettes—and Chantrel cigarette papers free.

From the standpoint of real smoking pleasure, there's nothing like rolling your own with the smooth, mellow, fragrant Virginia tobacco that you get in the Turret Fine Cut package.

It does pay to roll your own with Turret Fine Cut.

1½ and 20 packages—also in ¼ lb. vacuum tins

FREE Chantrel cigarette papers with every package.

TURRET

FINE CUT

Cigarette Tobacco

to rid himself of the impression that something of an unpleasant nature impended.

He glanced through the open window facing him. Afterwards, he was always able to recall every little detail of the picture upon which his eyes rested; it was etched upon his mind as indelibly as though cut upon steel with a graver's tool.

Although the mellow sunlight of September flooded the lawns and terraces, that indescribable change which heralds autumn had already begun to manifest itself. Not that any hint of chill as yet edged the balmy atmosphere or tint of russet reddened the gently waving foliage of the trees. It was something less definite—a suggestion of maturity, of completed ripening, conveyed by the deep, rich green of the grass, the strong, woody growth of the trees, the full-blown glory of the roses nodding on their stems.

To the left, in the shade of a stately cedar, Lady Anne and Jean were encamped with their sewing and writing materials at hand, and the rays of sunshine, filtering between the widespread branches above them, woke fugitive gold and silver lights in the downbeat auburn and white-crowned heads. Further away, in the valley below, the brown smudge of a wide-bottomed boat broke the smooth expanse of the lake whence the mingled laughter of Nick and Claire came floating up on the breeze. It was a peaceful scene, full of intimate happiness and tender promises, and Blaise watched it with contented eyes. The voice of Blaise, formal and urbane, roused him from a pleasant reverie.

"Madame de Varigny," announced that functionary, throwing open the door and standing aside for the visitor to enter.

Blaise rose courteously to greet her, holding out his hand. But the Countess shook her head.

"No, I will not shake hands," she said abruptly. "When you know why I am come, you will not want to shake hands with me."

There was something not unattractive about the outspoken refusal to sail under false colours, more especially softened as it was, by the charm of the faintly foreign accent and intonation.

Madame de Varigny had paused a

moment in the middle of the room and was regarding her host with curiously appraising eyes, and as Blaise returned her gaze he was conscious, as once before at the fancy-dress ball at Montaran, of the strange sense of familiarity this woman had for him.

"I am sorry for that," he said, answering her refusal to shake hands. "Won't you, at least, sit down?" pulling forward a chair.

"Yes, I will sit."

She sank into the chair with the quick, graceful motion of the South, and continued to regard Blaise watchfully between the thick fringes of her lashes. Had Jean been present, she would have been struck anew by the expression of implacability which hardened those dark brown eyes. By that, and by something else as well—a look of unmistakable triumph.

"I have much—much to say to you,

Monsieur Tor-ma-rin," she began at last. "I will commence by telling you a little about myself. I am—here she looked away for an instant, then shot a swift, penetrating glance at him—"an Italian by birth."

(To Be Continued.)

Always keep Douglas' Egyptian Liniment at hand, ready to bring immediate relief to burns, sores and felons. Stops bleeding at once. Prevents blood poisoning. Splendid for sore throat and quinsy.

It is said that "no man is a hero to his valet"—but if you want to get the real "low-down" you should hear what his banker thinks of him.

"Sir, my wife said I was to ask for a raise."

"Good, I'll ask my wife if I may give you one."

All Her Children Were Troubled With Diarrhoea

Mr. J. J. Bickert, R.R. 1, Enderby, B.C., writes:—

"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

Stony Plain and District

Miss Donaldson left Monday for her teaching appointment at Kinuso.

Mr and Mrs D W Pattie, of Rocky Mountain House, are spending their vacation with friends in this district.

The first load of grain to be hauled to Stony came on Saturday, the 3d; the load going to the Searle elevator. Mr Peters manager. The grain belonged to Fred Dornbusch, Golden Spike, and was an extra good No. 2.

Mr Weekes, who had been for the past month in charge of the local station at nights, has returned to his home at Edson, Mr McGillivray having resumed his regular duties.

Mr Bentley, of the Field Crops branch of the Dept. of Agriculture, accompanied by Mr Geo Herbert, recently appointed weed inspector for the Inga Municipality, have, since August, been giving the farms in Inga M. D a thore going over for weeds. Altho the inspection seems rather late in the season, it is to be noted that the weeds can be spotted in sheaves in stook as well as if these were in the growing crop.

Meeklenburg, the celebrated Optician, with offices at 10229 101st St., Edmonton, will be at the Royal Hotel, Stony Plain, Sat., Sept. 17, from 9 to 3.

BUTTER AND EGGS WANTED at The Royal Cafe.

Tait vs. Mitchell.

Followers of the manly art of self-defense have a treat in store for them tomorrow night, Sept. 12, when the well-known boxer Harry Mitchell meets Edmonton's popular mitt artist Benny Tait, in a boxing exhibition up at Gunn.

The show starts at 8.30, and there will be three or four good preliminaries by local artists. The main bout will be for ten rounds, and should prove very interesting, as anything is liable to happen. Each of the contestants is in first-class condition, and although Tait is conceding his opponent some 15 pounds, this may not prove too great a handicap for the redoubtable Benny.

A dance will follow the boxing, with a good City orchestra, and the admission set at a reasonable figure.

The Pool's Initial Payment

The initial payment for the Alberta Pool wheat for the 1932-3 crop year has been set at 35c per bu., basis of No. 1 Northern, Vancouver. Lists of prices for carlots and street wheat have been sent out to the various stations throughout the province. The initial payment is the same as that of last year.

Pulsate with Satisfaction.

The joyful hum of harvest to the tune of the threshing machine is a period when all farm life seems to pulsate with satisfaction. The bugbear of low prices may disturb our dreams at night but out in the harvest field the dust and sweat of pitching the golden sheaves into the inextinguishable jaw of the separator is the labor of love of a painful pleasure. Athabasca Echo.

Mr. and Mrs. Edwin Hoffman Entertain Their Friends.

Mrs Albert Becker came to Edmonton on Saturday last from Fort Sask'n to meet Mr and Mrs Edwin Hoffman, and motored out with them to Stony Plain, to see her son Lloyd get confirmed at the Rosenthal Lutheran church on the 4th. On the same day Rudolf Hennig, M.L.A. (who is Mrs Becker's neighbor), he and his wife brought the rest of the family, and took them home also.

When the confirmation service at the church was over, the party motored to Mr and Mrs E Hoffman's home, and forty more guests, all for a hearty dinner. After dinner, the day was spent with music and conversation, and all present had a good time.

Lloyd had stayed at the Hoffman home for two months while attending Confirmation school. He said "a friend in need is a friend indeed," and thanked Mr and Mrs E Hoffman in a hearty manner for the many kindnesses they had shown him. Lloyd has gone home, to resume his studies in grade 9 at the English school at the Fort.

Spruce Grove News.

Meeklenburg the Optician will be at Spruce Grove Sat., Sept. 17, from 3 to 8.

The M. Ducholke threshing outfit started operations Monday on the Jac Brox's grain fields, Jac's first load of wheat graded No. 1.

Miss Lavina Curtis is arranging to leave for Hollywood, California, in a short time, to escape the rigors of our northern winters. Miss Lavina made quite an impression at the recent competition in an Edmonton theater for the young lady who could most adequately portray the Panther Lady for a celebrated movie to be made at the Cinema Metropolis.

Mr Bates will shortly be occupying the residence on Main St. recently vacated by the Sutherland family.
